

GrassProtecta (Grass Reinforcement Mesh)

Description

GrassProtecta is a heavy duty slip resistant grass reinforcement mesh for areas prone to wear and rutting.

It is manufactured from partly recycled UV stabilised polyethylene and supplied in standard (11mm) and heavy (14mm) versions in rolls of either 2m x 20m or 1m x 10m.

Uses

- Grass car parks
- Fun trails
- Pedestrian paths
- Grass verges
- Caravan parks

Benefits

- Flexible and suitable for use on both flat and contoured surfaces
- Grass will grow through it
- Unobtrusive once grass grows
- Free draining
- Slip resistant
- Durable
- Easy to install

Technical Specification

Roll size :	2m x 20m & 1m x 10m
Weight:	1.2kg/m ² (Standard) & 2kg/m ² (Heavy)
Thickness:	11mm (Standard) & 14mm (Heavy)
Tensile strength (MD):	12kN/m (Standard) & 16kN/m ² (Heavy)
Slip Risk PTV value:	>40 (low)
Colour:	Green
Material:	HDPE 20% recycled

Installation Guide

After cutting the grass, mesh is simply unrolled and pinned to the surface using steel U-pins or plastic pegs.

It is recommended that new installations be left unused until the grass has grown through the mesh aperture to ensure strong interlock.
