

Grass Grid

Description

Grass Grid is a paver manufactured from recycled polyolefins. It is suitable for areas with occasional traffic of light to medium loading. It is fully permeable and will contribute towards flood prevention by allowing rain water to percolate naturally into the ground.

It can either be filled with a sand soil mix and grassed or filled with gravel.

Benefits

- Blends harmoniously into the environment.
- Environmentally friendly
- Manufactured from 100% recycled plastic
- Up to 90% of the surface is grassed or gravelled.
- Green finish — not visible through grass.
- Can be filled with gravel to provide alternative finish.
- Reinforces soil to increase load capacity.
- No additional surface water drainage required.
- SUDS compliant
- Quick to install.
- Cost effective.
- Interlocking detail
- Can be lifted and reused.

Uses

- Fire access ways
- Car parking
- Cycle paths
- Footpaths
- Golf & amenity tracks
- Agricultural entrances
- Erosion control
- Gate and style entrances

Specification

Dimensions:	330mm x 330mm x 40mm
Colour:	Green and grey
Composition:	100% recycled polyolefin
Wall thickness:	3mm
Grid height:	40mm
Weight:	0.57kg
Compressive strength:	Up to 10t axle load in accordance with DIN1072
Load bearing:	Up to 320t /m ² when installed on suitable sub-base
Temperature stability:	-50°C to 90°C
