

Permapanel

Description

PermaPanel is an economical and natural looking retaining wall system which requires minimal land up take.

It is ideal for use in car parks and gardens. It is normally manufactured using pressure treated timber and is now also available with Tanalith E preservative, which makes it suitable for use in playgrounds. If required, the Permapanel system can also be manufactured using our BBA certified Permacrib timber for a 125 year service life.

Benefits

- Maintenance free.
- Low cost option for retained heights of up to 1.5m.
- Can be manufactured using our BBA certified Permacrib timber giving a design life of up to 125 years.
- Can be pre-assembled for ease of construction.
- Simple and quick to install with no lifting equipment.
- Natural timber or stained finish to suit requirements.
- Slender section suitable for limited access applications.
- An attractive and cost effective alternative to low height brick walls.
